BARAN AKKOYUN

MSc. Architect

ABOUT ME

I am Baran, a citizen of Turkey. I was born in '93's mid-autumn, when wheat was seeded. Even though my family and I lived together in İstanbul, I have had a chance to see European countries and the different parts of Turkey. I spend my childhood in the ghetto in İstanbul. The road inbetween the neighborhood I lived to the seaside of Aegen sea, displays me a lot about architecture, how it interacts with storytelling both from heritage buildings, and how architecture occurred by the zeitgeist.

So far, on this planet, I have two publications, plus the thesis. My teams and I were nominated for the awards as well.

eVolo 2019 - Editor's Choise

Gothenburg Uni Library 2020 - 2nd Prize

YAC 2021 - Finalist

Bee Breaders 2022 - Finalist

I wish to become a member of your team to do what I love. "Architecture"

if it is needed, reference contacts will be provided.

WORK EXPERIENCE

Ahmet Alataş Workshop

Architect

October 2022 - On going

The process of designing, drawing application plans and doing renders by using Lumion is my prior responsible. I am modeling 3D of the plans and preparing the final presentations.

A4 Architecture

Architect

September 2021 - September 2022

The studio was designing interior of corporate companies' offices. My role was creating layouts, doing small renders, controlling construction site and running communication with the clients like presentations or design issues. I made four different projects from beginning to end, eight projects as total number I included.

Freelance

Architect // Designer

November 2020 - September 2021

After graduation, three international architectural competition and one national architectural competition were attended by three people including myself as a team leader. During this period, I also created amazon shop which I still continue to run with my college, and did renders and postproduction as a freelance designer at the sametime.

Dorte Mandrup A/S

BA Architect

January 2020 - July 2020

The journey of internship was ended one of the most respectful studio in Copenhagen, Denmark. The studio are working on mostly UNESCO heritage sites. I was participate on two invited competition from cover to cover that one of them has got second prize. Design proposals, 3D modeling, physical modeling (which is done in CNC, by hand made, and from 3D printer), presentation preparation was my assignments to do.
